

**PERSONAL INFORMATION Ahmad Ismael**

 jableh city, Alnakaa. Lattakia (Syria)

 +963937678656

 ahmadismaealkk@gmail.com

Sex Male | Date of birth 20/3/1996 | Nationality Syrian

EDUCATION AND TRAINING

University: Tishreen

Schools: yasin alnashar Damascus.

Bassam bacora.....Damascus.

Alehaa al araby.....Lattakia.

High school certificate 2014

BSC: pharmacology and pharmaceutical chemistry 2019.

University graduation rank: 2

Got rank 2 in the unified national exam in Syrian Arab republic 2019.

Master degree in laboratory diagnosis from faculty of Pharmacy, Department of Biochemistry and Microbiology at Tishreen University.

The master degree included a training mainly in the field of biochemistry, microbiology and molecular biology. In addition to that, the course involved a hospital training and working for two years in research lab dedicated for research related to leishmania and germs on molecular level.

I have successfully completed a course in introduction to the biology of cancer from JOHNS HOPKINS University.

I have successfully completed a course in introduction to genomic Technologies from JOHNS HOPKINS University.

Oxford online Placement test certificate certifies that

English level is B2.

WORK EXPERIENCE**AND SKILL**

Skills:

Practical experiences in performing PCR reaction, gel electrophoresis and RFLP technique.

Skills in cell culturing (I worked on culturing Leishmania parasites in two different culture medias /NNN & RPMI 1640/). Skills in working under first and second-class culture hut.

Experience in cloning and protein electrophoresis.

Experience in MTT assay technique, which is used to study the effect of a natural or chemical substance on the viable cells in vitro.

Worked as co-pharmacist at ALI SALEH pharmacy in Jableh for eight months in 2019.

Pharmaceutical marketing training in S.P.O office in 2020: we learned how to deal with different types of doctors personalities and how to convince them to try your product.

Worked as medical sales representative for NAWRAS pharmaceutical company from 10/2/2021 to 1/5/2021

I am working as a teaching assistant in department of biochemistry and microbiology at Tishreen University. Date of start: 22/10/2020 (valid) I am working as medical sale representative for APHAMEA medical company. Date of start: 3/8/2021(valid)

Volunteer at we care organization:

We care in none-profit organization providing services for children with cancers ranging from providing medicines to psychological support.

Laboratory experience:

Light microscopy, PCR-RFLP technique, MTT assay, cell culturing, sequencing, and phylogenetic study, in addition to experience in cloning and protein electrophoresis.

Worked for 7 months in hematology and biochemistry lab at Tishreen University Hospital

A part of my master thesis, I worked in the official leishmania treatment and diagnosis lab in Latakia for 7 months included the working on microscopy and immunocromatografic plates after taking the samples from patients

Publications

An article with the title "**leishmania typing in Lattakia, a coastal city in Syria**" is accepted for publication in RJPT journal / Research Journal of Pharmacy and Technology/ Q2

An article with the title: "**Visceral and Cutaneous Leishmaniasis epidemiology in Latakia Syria in 2021-2022**" is now under consideration by the editors.
